01.

ADVANCED NYLON POLYMER SHELL

This tough material is designed to flex in strategic locations and integrate with the internal layers to maximize impact performance and enhance comfort.

02.

3D PRINTED LATTICE INTERIOR

Layered 3D printed material completely covers the interior of the helmet to enhance comfort and fit and help defend against impact from all angles—dissipating energy safely & efficiently across the entire helmet lining.

03.

YOU ASKED. WE LISTENED.

Xenith® Orbit is a dynamic protective system that combines our deep experience in athlete protection, material technologies, and fit standards in an EQM-friendly helmet platform utilizing only 10 main components. This makes Orbit easy to assemble and maintain throughout the season.
