CHIN CUP INSTALLATION

We design the best protective gear in football.

IN THIS PACKAGE

**1 CHIN CUP + HIGH
CHIN STRAP**

**1 LOW
CHIN STRAP**

**4 SNAP
BUCKLES**

1 REMOVE THE EXISTING CHIN CUP

Undo all snap buckles from the helmet and remove buckles from the chin straps. Then, pull the chin cup so it slides off the low chin straps to remove.

To replace the low strap with a new one, loop it through the internal suspension system. Visit Xenith.com for additional help.

2 ATTACH THE NEW CHIN CUP TO THE LOW CHIN STRAP

With your new chin cup positioned upright and forward-facing, pull the low chin straps through the slots of the chin cup, then through just the first slot of the snap buckles in the direction of the arrows.

NOTE:

Do not feed low strap back through slot.

3

LOCK YOUR CHIN CUP INTO PLACE

Feed the end of the high chin strap under the facemask, then through the first slot of the snap buckles in the direction of the arrows. Adjust the buckles until the helmet fit is secure, then feed the chin straps through the second slot of the snap buckle to lock the fit in place.

WARNING

Wear at your own risk. No chin cup can prevent all injuries a player might receive while participating in football. Failure to follow product instructions may result in permanent injuries. **For football use only.** This chin cup has been tested to be compatible with Xenith helmets only. Use on any helmet other than Xenith helmets will be at your own risk. **For more information, visit Xenith.com.**
